

# International Journal of Extreme Manufacturing

The *International Journal of Extreme Manufacturing* (IJEM) is a leading, worldwide scientific journal focused on the fields of extreme manufacturing. IJEM is devoted to publishing original research of the highest quality and impact in the areas related to extreme manufacturing, ranging from fundamentals to process, metrology, conditions, environments, and system integration.

Since launched in 2019, IJEM has published **8 issues** with **total downloads over 110,000**, and has been indexed by **Scopus, DOAJ, Inspec** etc.

**Editor-in-Chief**

**Dongming Guo**

*Dalian University of Technology,  
China*

**International Editor-in-Chief**

**Yongfeng Lu**

*University of Nebraska-Lincoln,  
USA*

## Scope

- Material interactions with energy beams and fields
- Approaches and theories of processing
- Metrology and characterization
- Equipment and systems
- Extreme conditions

## Free services

- Open access free of charge
- Free and professional English polishing
- Free and high quality figure editing
- Free widest possible global promotion

## Contact us

- **Website:** [iopscience.org/ijem](http://iopscience.org/ijem)
- **E-mail:** [office@ijem.org.cn](mailto:office@ijem.org.cn)

**Looking for Your Support, Contribution and Promotion for IJEM!**
